## Objective

Aspiring **Full-Stack Developer** with hands-on experience in the **MERN Stack** and **Django**, specializing in scalable REST APIs, secure authentication systems, and responsive web applications. Seeking an entry-level software developer role to apply strong problem-solving and full-stack development skills.

## Education

MCA – <b>Jamal Mohamed College, Trichy</b>	2024 – Present
• Focus: Software Architecture, Web Technologies, AI	
• Coursework: Data Structures, Web Development, Databases, Cloud Computing	
BCA – <b>Jamal Mohamed College, Trichy</b>	2021 – 2024
• CGPA: 8.2/10	
• Coursework: OS, Networking, Java, Python, Software Engineering	

## Technical Skills

- **Languages:** JavaScript, Java, Python, C, C++
- **Frontend:** React.js (Hooks, Context API), HTML5, CSS3, Tailwind CSS
- **Backend:** Node.js, Express.js, Django, REST APIs, JWT Authentication, MVC Architecture
- **Databases:** MongoDB, MySQL, PostgreSQL
- **Concepts:** CRUD Operations, API Integration, Authentication & Authorization, SDLC
- **Tools:** Git, GitHub, Postman, Vercel, Netlify, Render

## Experience

<b>Software Developer Intern</b> , Fabs Infotech	Feb – July 2025
• Developed ERP and CRM modules using <b>Python</b> and <b>Django</b> , supporting core business workflows.	
• Built and secured <b>REST APIs</b> with <b>JWT</b> -based authentication and role-based access control.	
• Optimized backend logic, improved query performance, and resolved production bugs.	

## Projects

<b>OBE – Outcome-Based Education Management System</b>	GitHub Repo
• Built a full-stack OBE platform aligned with <b>NBA/NAAC</b> standards, supporting <b>10,000+ students</b> and <b>500+ staff</b> .	
• Implemented dynamic <b>CO-PO mapping</b> , automated analytics, and reporting modules.	
• Received <b>Rs.10,000 institutional funding</b> from Jamal Mohamed College for successful development.	

<b>Famease – Family Management System</b>	Project Link
• Developed a secure web application for managing shared family tasks, notes, and routines.	
• Implemented user-specific to-do lists with authentication and responsive UI.	
• <b>Technologies:</b> React.js, Node.js, Express.js, MongoDB, Tailwind CSS	

<b>Claim Management System</b>	GitHub Repo
• Built an automated claim verification system with role-based access and secure workflows.	
• Implemented phone-based staff lookup and automated claim calculations.	
• Awarded <b>Rs.10,000 project funding</b> for successful system implementation.	

## Certifications & Workshops

<b>Login Symposium – Idea Quest Hackathon</b> , PSG College of Technology, Coimbatore	2025
• <b>Web Development Workshop</b> , National Institute of Technology (NIT), Trichy	2024
